Introduction

Welcome to the 2015.2.2 release of MYOB Advanced Business.

What's New in this Release?

The 2015.2.2 release features enhancements and fixes to issues identified in previous releases. The following sections provide details of the changes included in this release.

Installing this Release

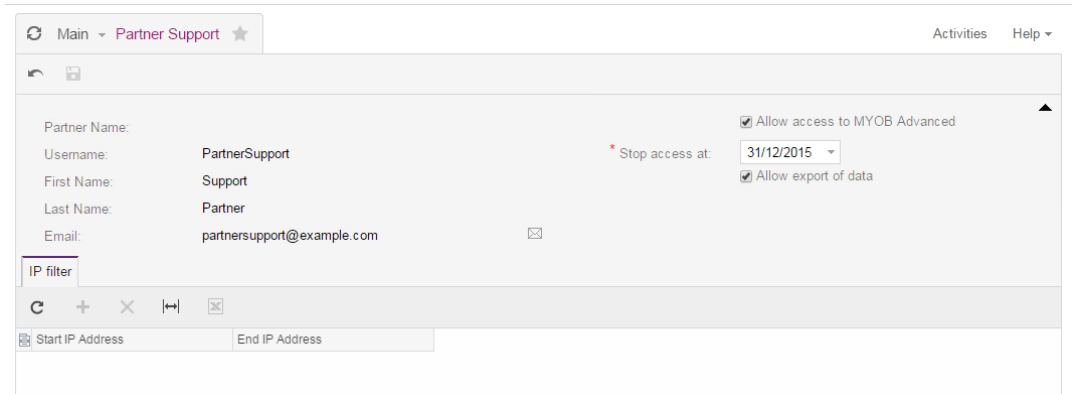

The 2015.2.2 service pack is automatically deployed to all production accounts.

An updated licence is required if you are upgrading from a version of MYOB Advanced prior to 2015.2. While accounts in our managed environment will have their licences updated automatically, a local installation must be updated manually by navigating to the Licence Maintenance (SM.20.15.10) form and clicking the **Update Licence** button.

New Features

Partner Support IP Filtering

This release adds an IP Filter tab to the Partner Support form (MY.SM.20.10):

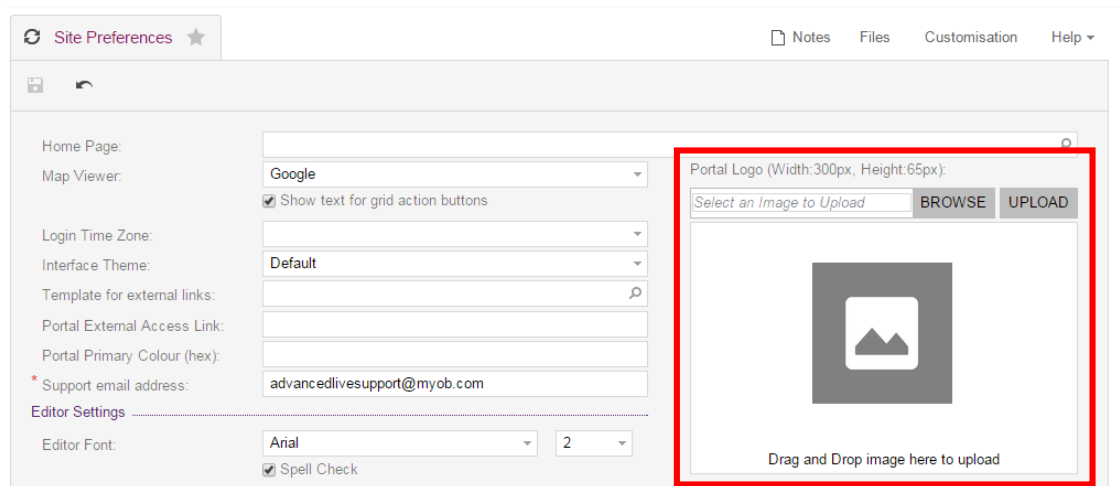

A screenshot of the 'Partner Support' form in a web application. The form has a tabbed interface with 'IP filter' selected. The main form area contains fields for 'Partner Name', 'Username' (PartnerSupport), 'First Name' (Support), 'Last Name' (Partner), and 'Email' (partnersupport@example.com). To the right, there are checkboxes for 'Allow access to MYOB Advanced' and 'Allow export of data', and a 'Stop access at' dropdown set to '31/12/2015'. Below the main form is a section for 'IP filter' with a table containing 'Start IP Address' and 'End IP Address' columns.

You can optionally specify one or more IP address ranges using the IP Filter tab; the Partner Support user will only be able to access the system if their IP address falls within one of the ranges you specify.

Note: Any IP range(s) you enter here will be copied to the IP Filter tab on the Users form (SM.20.10.10) for the Partner Support user.

Portal Login Image

This release adds the ability to upload an image file to be used as a logo on the Customer Portal login screen. The Site Preferences (SM.20.05.05) form has a new **Portal Logo** section, which allows you to select and upload the image:

A screenshot of the 'Site Preferences' form. The 'Portal Logo' section is highlighted with a red box. It includes a label 'Portal Logo (Width:300px, Height:65px):', a text input 'Select an Image to Upload', and 'BROWSE' and 'UPLOAD' buttons. Below this is a large square area with a placeholder image (a mountain) and the text 'Drag and Drop image here to upload'.

Note: Image files should be in BMP, JPG, GIF or PNG format. Images should be 300 x 65 pixels - images with different dimensions will be resized to 300 x 65.

Resolved Issues

The following table details the issues that are addressed by this release.

Problem ID	Description
115488661719 117396815136 117101318208 117013227497 115760151109 115342316148	Issues with the security roles set up on the Access Rights by Role form (SM.65.15.00) meant that screens could sometimes be accessed by users who should not have been able to access them, and that SQL errors could occur when users attempted to access screens where their access rights had been set to "Not Set". These issues have been resolved.
116286499676 117291630216 116286499316	Preparing a Tax Report generated the error message "Another process has added 'TaxHistory' record." This has been resolved.
117659944877 117677952917 117650460915	MYOB Advanced 2015.2 incorrectly removed the "Purchase to Order" function from all editions. This has been resolved.
116302247316 116302083246	Users with the "Project User" Licence Type were incorrectly denied access to the Purchase Orders form (PO.30.10.00). This has been resolved.
115009620121 114534599846	ARM reports gave the error "Object reference not set to an instance of an Object" when using Unit Sets. This has been resolved.
114972908752 114916098231	It was not possible to post AP Bills to GL if any bill contained a rounding difference; the error "Rounding amount exceeds the limit (0.0000). Please review the document." always appeared, regardless of how rounding settings were configured. Similarly, it was not possible to release an invoice that contained a rounding difference, as the error "Document is out of balance" appeared. These issues have been resolved.
115656555851 115656094690	An error message appeared when attempting to print the Tax Summary and Tax Details reports from the Reports dropdown of the Release Tax Report form (TX.50.20.00). This has been resolved.
117826113869 117826113866	Error messages could appear when editing sub-accounts if the "Default" sub-account Segmented Key ID had been deleted. This has been resolved.
116415367440 116415367406	It was not possible to release activities that were created on MySQL. This has been resolved.
117412739508 117396815139	Attempting to release a kit that included non-stock items resulted in the error message "UpdateShippedNotInvoiced may not be empty". This has been resolved.
-	When generating reports on the Cash Sales (AR.30.40.00) and Invoices (SO.30.30.00) forms, if a report was emailed, the system did not flag it as emailed, so subsequent printings would not have the correct "Copy" label. This has been resolved.
-	Attempting to create a snapshot after upgrading to MYOB Advanced 2015.2 produced the error "Error:68: An error occurred while importing data into 'DRDeferredCode' table." This has been resolved.

-	This release includes an enhancement to Generic Inquiries, adding the ability to create complex JOIN conditions with multiple parent tables joining same child table, for example LEFT JOIN TableC AS c ON a.Field1 = c.Field1 AND b.Field2 = c.Field2
-	This release significantly improves the performance of Purchase Order creation when using the Excel import/export grid function.
-	The “On the Fly” entry checkbox was disabled for INSUBITEM segmented key in CS202000. This has been resolved.
-	URL links that referenced record IDs using the AcctCD key were dropping the last parameter. For example: https://demo.myobadvanced.com/?ScreenId=AR303000&AcctCD=ABCSTUDIOS This has been resolved.
-	Newly created portal users could sometimes not see the portal site map when logging in for the first time. This has been resolved.

Known Issues

The following Known Issues have been identified in this release.

Partner users visible on some forms

User accounts with the licence type MYOB_Partner and the Admin account used exclusively by MYOB are hidden from all other users; they do not appear on user selection lists. However, these user accounts will appear in selection lists on the following forms:

- Event > Attendees (CR.30.60.30)
- Role List (SM.65.10.00)

Tax report errors

Selecting the **Print Tax Summary** or **Print Tax Details** options from the Reports dropdown on the Release Tax Report form (TX.50.20.00) generates an error message. These reports can still be run from the reports section of the Taxes module; only the dropdown options on the Release Tax Report form cause errors. This issue will be addressed in an upcoming service pack release.
