Introduction

Welcome to the 2015.2.4 release of MYOB Advanced Business.

What's New in this Release?

The 2015.2.4 release features enhancements and fixes to issues identified in previous releases, in particular issues around product licensing. The following sections provide details of the changes included in this release.

Installing this Release

The 2015.2.4 service pack is automatically deployed to all production accounts.

An updated licence is required if you are upgrading from a version of MYOB Advanced prior to 2015.2. While accounts in our managed environment will have their licences updated automatically, a local installation must be updated manually by navigating to the Licence Maintenance (SM.20.15.10) form and clicking the **Update Licence** button.

New Features

Licensing Updates

Highlighting Entitlements

The entitlements displayed on the Licence Maintenance form (SM.20.15.10) are now highlighted differently when they are near or over their limits, making it easier to read the form at a glance.

Entitlements that are near their limit are highlighted with orange text, and entitlements that have exceeded their limit are highlighted red:

The screenshot shows the 'Licence Maintenance' form in MYOB. The top section displays license details: Installation ID, Status (Valid), Valid From/To dates, Edition (Enterprise), Billing State (Active), Next Billing Date, and Billing Contact. Below this is a table of 'Entitlements' with columns: Name, Description, Limit, Usage, and Available. The 'Storage Space' row is highlighted in green, indicating it is near its limit. The 'Companies' row is highlighted in red, indicating it has exceeded its limit.

Name	Description	Limit	Usage	Available
Project User	Access to Project management module and i...	2 user(s)	1 user(s)	1 user(s)

Portal Users	Customer Portal	10 Portal(s)	1 Portal(s)	9 Portal(s)

Resolved Issues

The following table details the issues that are addressed by this release.

Problem ID	Description
117100560208 117100560205	This release resolves the following issues related to OData: <ul style="list-style-type: none">• OData support was only available for instances with a single company file. This has been resolved; support is now available for services running multiple company files.• It was not possible to access an OData interface, if the MYOB Advanced site resided behind a load balancer and connections between the load balancer and MYOB were not secure.
118485149122 118134485451	It was not possible to add a Non Stock item to a Sales Order if the item was flagged as a kit. This has been resolved.
118513917605 119397481921 119367074551 117845489391	The Customer screen took a long time to appear when it was opened during the process of creating a Sales Order. This has been resolved.
117619974918 117619974916	Changes to the branch or default email account on the Mail Settings tab of the Customers (AR.30.30.00) or Accounts Receivable Preferences (AR.10.10.00) forms were not saved. This has been resolved.
117120360369 117120360366 117073962591	When operating in a cloud environment, it was not possible to create a shipment for a Sales Order if order line data had been uploaded from a document. This has been resolved.
111526256453 111371307211	An issue occurred during the upgrade procedure from MYOB Advanced 1.x to 2015.x that was related to conversion of the noteID field from longint to GUID. The code that handled the upgrade was not considering the company ID as a part of the join criteria; this has been resolved.
118421146258 118417386220	Sales Orders without shipments created before upgrading to MYOB Advanced 2015.x may have LineType = null in the SOLineSplit table, resulting in Inventory items not reporting the correct stock balance. This has been resolved.
118672588386 118054982271	There were a number of entry issues existing when saving records on the Expense Claims (EP.30.10.00) form, if it was being used in conjunction with the Project Accounting module. These have been resolved.
118483311721	Custom data access classes declaration was incompatible with Use Runtime Compilation option. This has been resolved.
-	The PartnerSupport user could not access the Employee Setup form (EP.20.30.00). This has been resolved.
-	It was not possible to save a case on the Customer Portal, if the case class required a contract. This has been resolved.
-	Uploading a file by dragging and dropping it onto the Advanced Business interface failed to save the file. This has been resolved.

Licensing Changes

118140026975 The Storage Space entitlement was not calculated correctly, which could result in sites
118003962901 being told incorrectly that they had exceeded their entitlement. This has been resolved.

- This release contains the first of a range of planned licensing changes, which involve adding and removing access in line with the expected behaviour of the MYOB Advanced licence types. This release includes updates to the licensing of the Approval Workflow and Cross-Reference Items features.

Known Issues

The following Known Issues have been identified in this release.

Partner users visible on some forms

User accounts with the licence type MYOB_Partner and the Admin account used exclusively by MYOB are hidden from all other users; they do not appear on user selection lists. However, these user accounts will appear in selection lists on the following forms:

- Event > Attendees (CR.30.60.30)
- Role List (SM.65.10.00)

Testing email settings on Gmail

When clicking the **Test** button on the System Email Accounts form (SM.20.40.02) to test a Gmail address, an error will result if two-step authentication has been enabled for the Gmail account.
