Introduction

Welcome to the 2015.2.5 release of MYOB Advanced Business.

What's New in this Release?

The 2015.2.5 release features fixes to issues identified in previous releases. The following sections provide details of the changes included in this release.

Installing this Release

The 2015.2.5 service pack is automatically deployed to all production accounts.

An updated licence is required if you are upgrading from a version of MYOB Advanced prior to 2015.2. While accounts in our managed environment will have their licences updated automatically, a local installation must be updated manually by navigating to the Licence Maintenance (SM.20.15.10) form and clicking the **Update Licence** button.

Resolved Issues

The following table details the issues that are addressed by this release.

Problem ID	Description
118513917605 119397481921 119367074551 117845489391	This release improves system performance when creating Sales Orders, specifically the speed taken to open the Customers window when selecting a customer from the order.
119973590273 119941210931	The Confirm Shipment option was missing from the Actions list on the Shipments form (SO.30.20.00) for some users. This has been resolved.

Known Issues

The following Known Issues have been identified in this release.

Partner users visible on some forms

User accounts with the licence type MYOB_Partner and the Admin account used exclusively by MYOB are hidden from all other users; they do not appear on user selection lists. However, these user accounts will appear in selection lists on the following forms:

- Event > Attendees (CR.30.60.30)
- Role List (SM.65.10.00)

Testing email settings on Gmail

When clicking the **Test** button on the System Email Accounts form (SM.20.40.02) to test a Gmail address, an error will result if two-step authentication has been enabled for the Gmail account.
