Introduction

What's New in this Release?

The 2018.02 release is an update to the 2018.01 compliance release, which addresses an issue identified in previous releases and provides an update to the Awards and Pay Classes feature.

For full information on the changes introduced in the 2018.01 release, see the [Exo Employer Services 2018.01 Release Notes](#).

The 2017.06 and 2018.01 releases introduced support for Single Touch Payroll to Exo Employer Services. For information on setting up and using Single Touch Payroll, see the [Single Touch Payroll White Paper](#) on the Exo Employer Services Education Centre website.

The purpose of this document is to provide essential information on the installation and use of this release:

- The **Installation** section provides an overview of the installation process, including pre-installation requirements and post-installation steps.
- The **New Features** section describes all new features introduced in this release.
- The **Resolved Issues** section describes all issues that have been addressed by this release.
- The **Known Issues** section details any issues in this release that have been identified as requiring attention.

Need assistance? If you have any questions or you need assistance with installing this update, please contact your MYOB Accredited Business Partner. Alternatively, the answers to most common installation issues can be found on the MYOB Enterprise Knowledgebase at <http://myobexo.custhelp.com/>.

Installation

Pre-Install Requirements

Requirements for PCs running Exo Employer Services components are detailed in the Minimum System Requirements document, available on the [MYOB website](#).

Installing Exo Employer Services

Information on installing and upgrading MYOB Exo Employer Services is maintained on the MYOB Enterprise Knowledgebase. See the following articles:

- [Upgrading MYOB Exo Employer Services Online](#)
- [Upgrading MYOB Exo Employer Services Manually \(Australia\)](#)
- [How do I run Network.exe?](#)

Note: Check the Known Issues section on page 5 for any known installation issues.

Check the Release

After the installation is complete, the version numbers of all MYOB Exo Employer Services applications should be as follows:

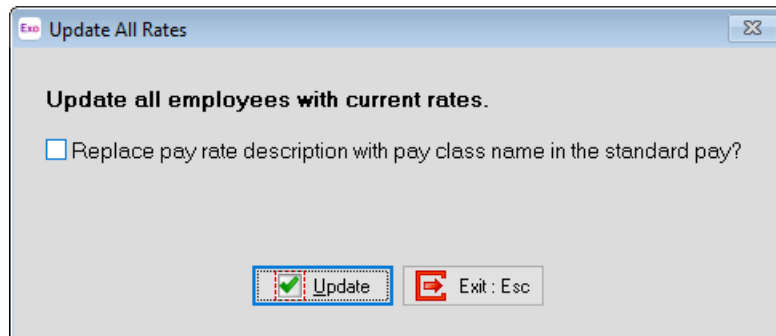

Application	Version
MYOB Exo Employer Services	2018.02
MYOB Exo Payroll	2018.02
MYOB Exo Employee Information	2018.02
MYOB Exo Time and Attendance	2018.02
Runtime Files	09.00.0000.7423

To check that this release installed successfully, check that the versions displayed on the About window (**Help menu > About**) match the versions listed here.

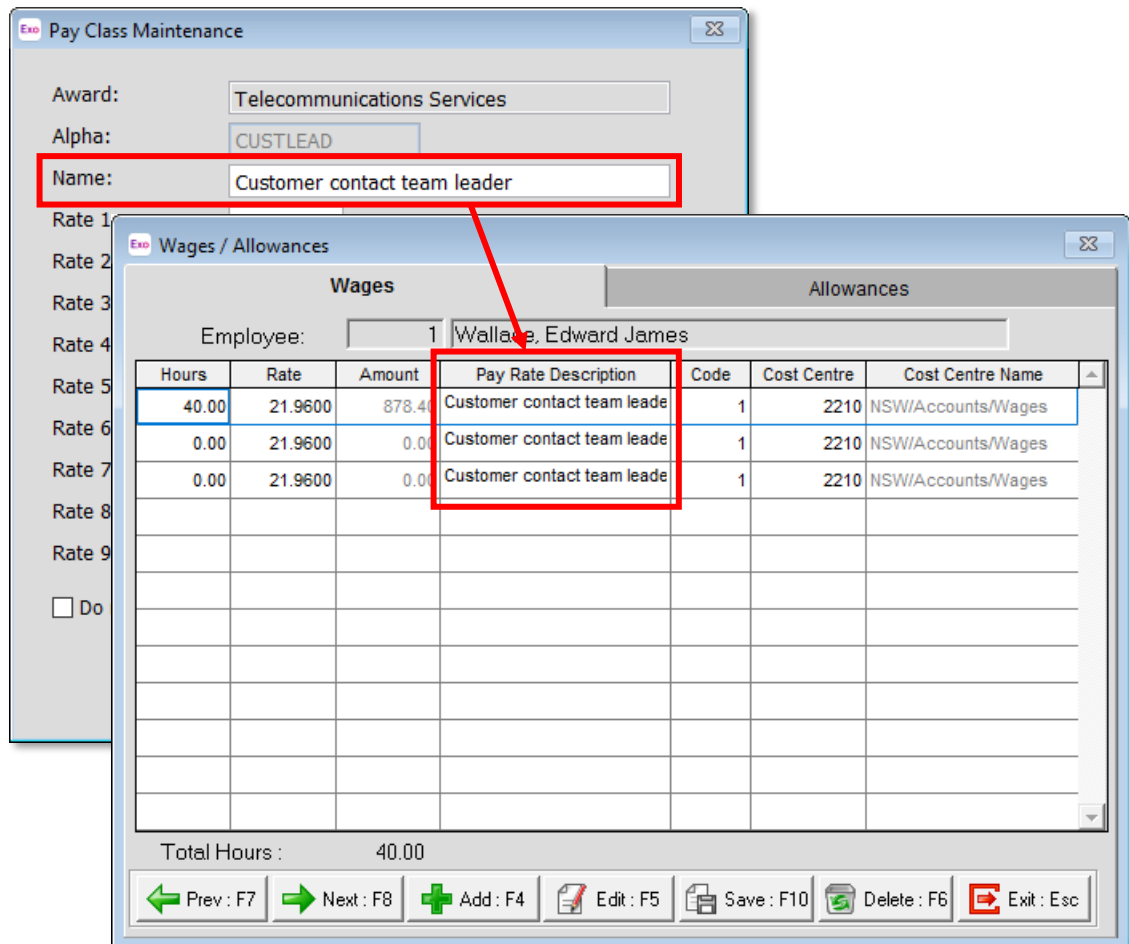

New Features

Awards and Pay Classes Update

In previous release, when using the Awards and Pay Classes utility to update employee's rates, the name of the Pay Class assigned to employees would always overwrite the name of the pay rate is the Standard Pay. This is now optional—a new check box is available on the Update All Rates window:

If this box is ticked, the Pay Class name will overwrite the name in the Pay Rate Description field on the Wages section of employees' Standard Pays. If it is not ticked, the names on the Wages section will not be changed.

Resolved Issues

The following issues have been addressed in this release:

Problem Record	Service Request	Description
147056767858	149465372301 146543554571	This release adds the option to overwrite the Pay Rate Description of wages in the Standard Pay with the name of a Pay Class when using the Awards and Pay Classes feature—see page 3.
-	-	It was not possible to submit an STP finalisation event for the 2017–2018 financial year once the 2018-2019 financial year had begun. This has been resolved.

Known Issues

The following Known Issues have been identified in this release.

Error 2066 in a networked environment

The FoxPro error: “2066/Index file [filename].CDX is corrupt. Please rebuild it” can occur persistently on network systems that have a Server 2008 operating system with workstations running Windows Vista, Windows 7 or 2008 Terminal Server; or peer-to-peer networks where the server/workstation is running a Windows Vista or Windows 7 operating system, and one or more other workstations are also using a Windows Vista or Windows 7 operating system.

For information on this issue and suggested workarounds, see the following articles on the MYOB Enterprise Knowledgebase:

- [What to do when getting an Error 2066 message](#)
- [Consistent error 2066 in a networked environment](#)
