Introduction

What's New in this Release?

The 2018.04 release provides an update to state payroll tax in South Australia and addresses issues identified in earlier releases.

The purpose of this document is to provide essential information on the installation and use of this release:

- The **Installation** section provides an overview of the installation process, including pre-installation requirements and post-installation steps.
- The **New Features** section describes all new features introduced in this release.
- The **Resolved Issues** section describes all issues that have been addressed by this release.
- The **Known Issues** section details any issues in this release that have been identified as requiring attention.

Need assistance? If you have any questions or you need assistance with installing this update, please contact your MYOB Accredited Business Partner. Alternatively, the answers to most common installation issues can be found on the MYOB Enterprise Knowledgebase at <http://myobexo.custhelp.com/>.

Installation

Pre-Install Requirements

Requirements for PCs running Exo Employer Services components are detailed in the Minimum System Requirements document, available on the [MYOB website](#).

Installing Exo Employer Services

Information on installing and upgrading MYOB Exo Employer Services is maintained on the MYOB Enterprise Knowledgebase. See the following articles:

- [Upgrading MYOB Exo Employer Services Online](#)
- [Upgrading MYOB Exo Employer Services Manually \(Australia\)](#)
- [How do I run Network.exe?](#)

Note: Check the Known Issues section on page 5 for any known installation issues.

Check the Release

After the installation is complete, the version numbers of all MYOB Exo Employer Services applications should be as follows:

Application	Version
MYOB Exo Employer Services	2018.04
MYOB Exo Payroll	2018.04
MYOB Exo Employee Information	2018.04
MYOB Exo Time and Attendance	2018.04
Runtime Files	09.00.0000.7423

To check that this release installed successfully, check that the versions displayed on the About window (**Help menu > About**) match the versions listed here.

New Features

Update to SA Payroll Tax

This release updates Exo Payroll to be compliant with recent changes to Payroll Tax in South Australia. From 1 January 2019, businesses with annual taxable wages of up to \$1.5 million are exempt from payroll tax and those with wages between \$1.5 million and \$1.7 million have a reduced payroll tax rate. See the RevenueSA website for more information:

<https://www.revenuesa.sa.gov.au/taxes-and-duties/payroll-tax/rates-and-thresholds>

PDF Update

This release updates the PDF driver used by Exo Payroll to a newer version.

Resolved Issues

The following issues have been addressed in this release:

Problem Record	Service Request	Description
166384597967	166866868691 166163311161 166163311151 166067395662 164098410291	The Post to Exo Business function was not working for versions 2018.4 or later of Exo Business. This has been resolved: when you select I use Exo Business 2018.4 or newer in the Exo Payroll installer, an updated DLL will be installed.
166144595175	165971487381	After a sync with MyStaffInfo, any leading zeroes on employees' post codes would be removed, e.g. 0812 would change to 812, causing STP submissions to be rejected. This has been resolved. Note: Installing this version of Exo Payroll also installs the 2019.01 version of the MyStaffInfo Management Console.

Known Issues

The following Known Issues have been identified in this release.

Error 2066 in a networked environment

The FoxPro error: “2066/Index file [filename].CDX is corrupt. Please rebuild it” can occur persistently on network systems that have a Server 2008 operating system with workstations running Windows Vista, Windows 7 or 2008 Terminal Server; or peer-to-peer networks where the server/workstation is running a Windows Vista or Windows 7 operating system, and one or more other workstations are also using a Windows Vista or Windows 7 operating system.

For information on this issue and suggested workarounds, see the following articles on the MYOB Enterprise Knowledgebase:

- [What to do when getting an Error 2066 message](#)
- [Consistent error 2066 in a networked environment](#)
