Managing a trust - AU

The client Corporate admin page lets you manage your client's trust details.

From here, you can view and edit the trust details or appoint and remove trustees and members.

When you establish trust using Corporate admin, we'll create a new MYOB Practice client for the trust. This means you can easily view and edit the trust from the Corporate admin page.

If you have existing trust clients, you can fill in the blank fields in each tab to add information about the trust.
