## Issues Resolved

This chapter describes issues resolved in this release version.

### All Countries

*Employee fields are read-only when adding new employees if Workforce management enabled*

#### Details

When adding new employees for companies that had Workforce Management enabled, some employee fields would be set to read-only and the user would be unable to edit them.

#### Resolution:

The checks for Workforce Management enabled employees have been changed to ensure they behave correctly when adding new employee records and leaves the fields as editable.

*Reference Number: PGDEV-6045*
