Introduction

What's New in this Release?

The 2017.03 release updates the Exo Payroll module for recent changes to South Australia state payroll tax and addresses issues identified in previous releases.

The purpose of this document is to provide essential information on the installation and use of this release:

- The **Installation** section provides an overview of the installation process, including pre-installation requirements and post installation steps.
- The **New Features** section describes all new features introduced in this release.
- The **Resolved Issues** section describes all issues that have been addressed by this release.
- The **Known Issues** section details any issues in this release that have been identified as requiring attention.

Need assistance? If you have any questions or you need assistance with installing this update, please contact your MYOB Accredited Business Partner. Alternatively, the answers to most common installation issues can be found on the MYOB Enterprise Knowledgebase at <http://myobexo.custhelp.com/>.

Installation

Pre-Install Requirements

Requirements for PCs running Exo Employer Services components are detailed in the Minimum System Requirements document, available on the [MYOB website](#).

Installing Exo Employer Services

Information on installing and upgrading MYOB Exo Employer Services is maintained on the MYOB Enterprise Knowledgebase. See the following articles:

- [Upgrading MYOB Exo Employer Services Online](#)
- [Upgrading MYOB Exo Employer Services Manually \(Australia\)](#)
- [How do I run Network.exe?](#)

Note: Check the Known Issues section on page 5 for any known installation issues.

Check the Release

After the installation is complete, the version numbers of all MYOB Exo Employer Services applications should be as follows:

Application	Version
MYOB Exo Employer Services	2017.03
MYOB Exo Payroll	2017.03
MYOB Exo Employee Information	2017.03
MYOB Exo Time and Attendance	2017.03
Runtime Files	09.00.0000.7423

To check that this release installed successfully, check that the versions displayed on the About window (**Help menu > About**) match the versions listed here.

New Features

SA Payroll Tax Update

South Australia has changed the structure of its payroll tax: the current small business payroll tax rebate has been replaced by a new tiered payroll tax rate structure, effective 1 July 2017:

Annual payroll threshold	Rate
Does not exceed \$600,000	nil
Exceeds \$600,000 but not \$1,000,000	2.50%
Exceeds \$1,000,000 but not \$1,500,000	variable from 2.50% to 4.95%
Exceeds \$1,500,000	4.95%

Information on these changes is available at:

<http://www.revenuesa.sa.gov.au/services-and-information/state-budget-updates>

MYOB Exo Payroll has been updated to calculate SA payroll tax according to this new structure.

Resolved Issues

The following issues have been addressed in this release:

Problem Record	Service Request	Description
146480484014	145851280671	In some environments, when a pay was created from the Pay List window, superannuation amounts could appear incorrectly from some employees. Opening an affected employee's pay and clicking Save would correct the issue. This has been resolved.
-	-	This release adds a Gender column to the Pay Details window (open from the Pay List).

Known Issues

The following Known Issues have been identified in this release.

Error 2066 in a networked environment

The FoxPro error: "2066/Index file [filename].CDX is corrupt. Please rebuild it" can occur persistently on network systems that have a Server 2008 operating system with workstations running Windows Vista, Windows 7 or 2008 Terminal Server; or peer-to-peer networks where the server/workstation is running a Windows Vista or Windows 7 operating system, and one or more other workstations are also using a Windows Vista or Windows 7 operating system.

For information on this issue and suggested workarounds, see the following articles on the MYOB Enterprise Knowledgebase:

- [What to do when getting an Error 2066 message](#)
- [Consistent error 2066 in a networked environment](#)
