# Introduction

## What's New in this Release?

This release addresses issues identified in previous releases.

## Installing Your Upgrade

> **Note:** The ability to update your software directly from within MYOB Ace Payroll is not available for this update. This functionality will be available again from the next release. Follow the instructions below to download and install the software update from the installer file.

### Before you start

- We recommend that you back up your payroll data file to an external drive.
- If your computer only allows users with administrator privileges to install programs, log in to Windows as an administrator.
- Close any open programs.
- Make sure you are connected to the internet.

### Download and install the update

1. Open MYOB Ace Payroll, select Utilities then System Information.
2. Write down the Program Folder location to confirm during installation.
3. Quit MYOB Ace Payroll.
4. [Download the update](#) and run the installer.
5. Follow the onscreen instructions, making sure to install Ace Payroll in the location you wrote down in step 2.
6. Enter your version registration code when prompted. (This code will have been sent to you in an email.)

### Check that your software is up to date

1. Start MYOB Ace Payroll
2. Press F5 to check the version number is 3.48B

If you have any questions, give us a call on 0800 ACE PAY (0800 223 729).

We're here to help.

# Resolved Issues

This release addresses the following issues:

- The error "Floating point division by zero" could appear when processing pays where any employees' **Days Worked Each Week** value is zero. This has been resolved.
- The amount of Holiday Pay owing for an employee would be incorrect if the employee used the **Min % of Gross** calculation method and had historic pays prior to 2000. This has been resolved.
- An Access Violation error could occur after running a pay or running the Leave Owing report. This has been resolved.
- An employee's Sick Leave accumulation method would be reset to the company default if their **Days Worked Each Week** value was changed. This has been resolved.
