# Introduction

Welcome to the 2017.1.1 release of MYOB Advanced.

## What's New in this Release?

The 2017.1.1 release addresses issues identified in previous releases. The following sections provide details of the changes included in this release.

## Installing this Release

The 2017.1.1 release is automatically deployed to all production accounts.

# Resolved Issues

The following table details the issues that are addressed by this release.

Problem ID	Description
<b>Finance</b>	
<b>140226502507</b> 140225434056	On the Ledgers form (GL.20.15.00), the “Statistical” option for <b>Balance Type</b> was available for all editions, although statistical ledgers are only available in the Enterprise and Developer editions. This has been resolved; the “Statistical” option is no longer available for the Plus and Standard editions.
<b>Distribution</b>	
<b>140095283168</b> 139433311391	The <b>Post to IN</b> action on the Invoices form (SO.30.30.00) did not remove serialised inventory items, which meant that the related shipment did not update inventory and the shipped items remained in the system as available. This has been resolved.
<b>System and Platform</b>	
<b>142231225899</b> 143327254571 143298748661 142231225893	The error message “An error occurred during processing of the field Role Name” appeared when attempting to create a new company. This has been resolved.
<b>142680819697</b> 142612136791	When attempting to generate a Web Service for the Salespersons form (AR.20.50.00), the error “Exception of type ‘System.Web.HttpUnhandledException’ was thrown” appeared. This has been resolved.
<b>Payroll</b>	
-	Adjustment transactions did not appear on the Entitlements History form (MP.PP.44.00), which meant that balances could be incorrect. This has been resolved.
-	After a new pay run was created, when the pay run changed to the “OPEN” status, the “INITIALISING” timer did not disappear and continued counting. This has been resolved.
-	In previous releases, Protected Earnings calculations were calculated on Taxable and Non-Taxable income. This was incorrect; Protected Earnings should be based on After Tax Pay only. This has been resolved.
-	Payment Methods in Advanced People are synchronised from Payment Methods in Advanced Business; if Payment Method settings were deleted in Advanced Business, the synchronisation could fail and causes “Object reference” errors. This has been resolved.

# Known Issues

The following known issues and breaking changes have been identified in this release.

## Partner users visible on some forms

User accounts with the licence type MYOB\_Partner and the Admin account used exclusively by MYOB are hidden from all other users; they do not appear on user selection lists. However, these user accounts will appear in selection lists on the following forms:

- Event > Attendees (CR.30.60.30)
- Role List (SM.65.10.00)
