Introduction

Welcome to the 2017.1.14 release of MYOB Advanced.

What's New in this Release?

The 2017.1.14 release is a hot fix release that address issues in the Payroll module that were identified in previous releases.

Installing this Release

The 2017.1.14 release is automatically deployed to all production accounts.

Note: An updated licence is required to enable configuration options for the new features. While accounts in our managed environment will have their licences updated automatically, a local installation must be updated manually by navigating to the Licence Maintenance (SM.20.15.10) form and clicking the **Update Licence** button.

Resolved Issues

The following table details the issues that are addressed by this release.

Problem ID	Description
Payroll	
159665538690 159592840231	The error message "Object reference not set to an instance of an object" could appear when attempting to submit a superannuation batch on the Superannuation Batch Details form (MP.PP.50.06). This has been resolved.
-	An error could occur when trying to update a Super Guarantee pay item in any employee's Standard Pay. This has been resolved.

Known Issues

The following known issues and breaking changes have been identified in this release.

Partner users visible on some forms

User accounts with the licence type MYOB_Partner and the Admin account used exclusively by MYOB are hidden from all other users; they do not appear on user selection lists. However, these user accounts will appear in selection lists on the following forms:

- Event > Attendees (CR.30.60.30)
- Role List (SM.65.10.00)

Errors with the “Portal Customiser User” user type

After adding the Administrator role to users with the user type Portal Customiser User, the error message “Administrator role not found in the system” will appear if the **Guest Role** option is not ticked for the Administrator role on the User Roles form (SM.20.10.05).

Note: This option is unticked by default.
